

SMART SLED PRO

POWERED BY:

The BodyKore Smart Sled Pro's innovative take on the standard push-pull sled challenges athletes to engage every muscle to build explosive all-over power, strength, agility and endurance. Here are some of the highlights about this dynamic training tool.

KEY FEATURES

DIGITIZED RESISTANCE

Convenience is king. The BodyKore Smart Sled uses digitized resistance (dual magnetic motors) to adjust workout intensity with *3x more resistance than any other sled on the market* (without any weights).

MULTI-PLANAR MOVEMENTS

Other sleds move in one direction. Not this one. Each wheel can be adjusted to its own resistance to allow athletes to train at a more competitive level.

LIVE DATA FEEDBACK

The app measures power, distance, stability and force production while providing feedback in real time. Trainers/coaches can monitor progress and make necessary adjustments to reach goals.

APP CONTROLLED

The BodyKore Smart Sled Pro is controlled through a patented, proprietary app by Mach Fitness Labs using Bluetooth technology to digitally reduce or intensify resistance or change modes during a workout. (The sled also has manual switches that can be used without the app.)

SMART SLED

POWERED BY:

Caster Wheels
360-degree rotation for
multi-planar movements

Removeable Handles
For easy storage

Ergonomic Handles
Five-point handle grips

Dual Weight Pegs
Holds up to an 1,000 lbs
of added resistance

**All Terrain Tires with High
Quality Alloy Wheels**
For indoor/outdoor use

Futuristic Design
For the cool factor

**Permanent Magnetic
Digital Resistant Motors**
For 3x more resistance than
other sleds

Tow Hook
For pulling and harness
workouts
